Sure-Scope®
Single-Use Laryngoscope with Integrated LED Light Source

OBP's Sure-Scope® is a single-use one piece laryngoscope with integrated LED light source. This ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the medical setting by making reusable light sources, handles, and blades obsolete.

Sure-Scope® is made of a revolutionary reinforced nylon compound, offering exceptional strength and rigidity. Each Sure-Scope® blade is validated to support over 40lbs of blade force, 4 times higher than intubation requirements.

obp is the leading global developer of single-use, self-contained, illuminating medical devices. We integrate light with device — making them one — creating effective and simplified single-use solutions. Our innovative products are used in more than 10,000 physician offices, surgery centers and hospitals throughout the U.S., as well as healthcare facilities worldwide. At obp, we illuminate the everyday.

BRIGHT & RELIABLE LIGHT SOURCE GUARANTEED

A 2009 study published in the Anesthesia & Analgesia found 75% of laryngoscope handles tested were positive for bacteria proving that even following mandates for cleaning and disinfection leaves pathogens.

AN AFFORDABLE AND RELIABLE SINGLE-USE LARYNGOSCOPE

The average cost of a reusable laryngoscope is $27.40/ intubation, according to a study conducted by Southeast Health. With SURE-SCOPE, healthcare facilities can effectively reduce their cost per intubation by greater than 50%.
