OBP Medical’s ANOSPEC is a single-use anoscope with built-in LED light source. This ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the medical setting by obsoleting rechargeable and plug-in light sources. ANOSPEC is designed to aid in the examination of the anus to screen, diagnose, evaluate, and treat problems of the anal canal. ANOSPEC is ideal for diagnostic and therapeutic anoscopy procedures.

**Product Features:**

- Single-use device is completely hygienic, eliminating the risk of cross-contamination
- Each ANOSPEC comes equipped with its own obturator and built-in single-use LED light source
- No assembly required and no additional parts needed
- High powered, battery-operated LED light source is ultra-bright, and can produce peak light for 30+ minutes
- LED light source generates no damaging heat
- The device's clear material allows for 360 degree visibility

**Think your current light source is clean?**

Think again. Recent studies demonstrate a clear potential for transmission of pathogens, and highlight a clear risk to both staff and patients.

- There are 4.5 hospital infections for every 100 patient admissions and nearly 100,000 deaths annually. (CDC)
- There are approximately 1.7 million hospital-acquired infections in U.S. hospitals, costing over $5 billion annually. (CDC)
- There are bacteria on 86% of instrument handles that are disinfected and designated ‘ready for use’ in hospital settings. (Journal of Hospital Infection)
