

# ONETRAC<sup>®</sup>

Single-Use Cordless Retractor with Integrated LED Light Source

# ONETRAC<sup>®</sup> LX

Single-Use Cordless Retractor with Integrated Multi-LED Light Source

## VISION

**ONETRAC** is the world's first single-use cordless surgical retractor with integrated LED light source and smoke evacuation channel. Illumination in the depths of a surgical tissue pocket or cavity can now be met within seconds; NO assembly, additional parts or fiber-optic cables required.

### ONETRAC LX EXCLUSIVE FEATURES

**Multiple lighting configurations** allows surgeons to achieve ideal illumination coverage within pocket

**Latest generation surface mounted LEDs** are 5x brighter with wider coverage

**Light intensity adjustment** dial allows user to set illumination strength to optimal level

## POWER

Each **ONETRAC** unit comes complete with a fully integrated LED light source. The **ONETRAC** light source, powered by alkaline button batteries, provides 1.5 hours of peak illumination strength. **ONETRAC**'s LED light source does NOT produce damaging heat.

### ONETRAC LX EXCLUSIVE FEATURES

**3 hours of continuous use** with all LED's activated and set to maximum illumination strength

**Primary, non-rechargeable** Lithium / Manganese dioxide batteries can be easily and safely removed for recycling

**Battery activation tab** preserves battery life and facilitates hands-free battery removal

## CONTROL

Each **ONETRAC** unit weighs less than 3 ounces. And because **ONETRAC** does not require the use of a fiber-optic cord, there is no added weight or limitation of movement or maneuverability.

### ONETRAC LX EXCLUSIVE FEATURES

**Color-coded size indicator** allows user to easily identify and differentiate blade sizes

**Illumination control panel** allows users to easily access and cycle through lighting configurations and illumination intensity

**Ergonomically designed handle** improves maneuverability during procedures
