obp’s ER-SPEC is a single-use vaginal speculum with integrated LED light source. The ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the medical setting by making rechargeable and plug-in light sources obsolete.

ER-SPEC is designed for use on women undergoing a procedure requiring vaginal access and exposure, such as a pelvic examination. Ideal for clinics, emergency rooms, urgent care centers, and physician offices; ER-SPEC is the most trusted brand of pre-lit single-use vaginal specula worldwide.
